A \$28 Billion Investment to Transform the Region's Airports

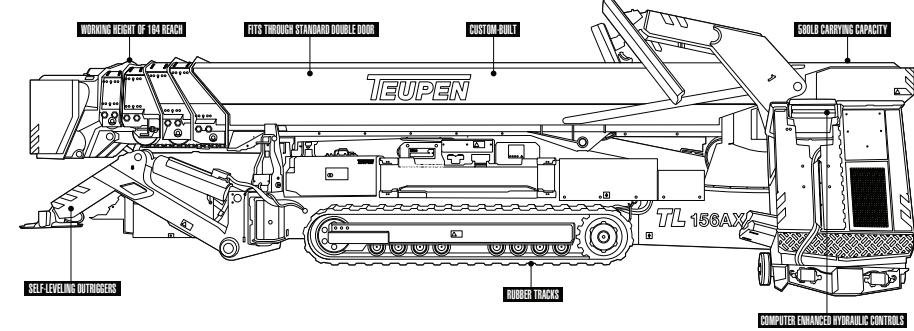

A \$28 billion public/private partnership investment is underway to transform the region's airports into true, 21st-century gateways. With a record number of travelers coming through them, our region's airports require larger, more modern, world class facilities to meet the needs of today's passengers. Three of the world's busiest airports – John F. Kennedy, Newark Liberty and LaGuardia airports – are being simultaneously transformed into a network of state-of-the-art, 21st-century facilities.

To learn more, visit [ANEWLGA.COM](#), [ANEWEWR.COM](#) & [ANEWJFK.COM](#)

A Whole New LGA	A New Terminal One at Newark Airport	Building a 21st-Century JFK
		
We are building an \$8 billion, entirely new 21st-century airport while maintaining full operations for over 30 million passengers each year. This will be the first new U.S. airport in 25 years. A new parking garage and the first new gates in Terminal B have already opened, and Delta's first new gates in Terminal C will open by the end of 2019. The new airport will be anchored by two new arrivals and departures halls. The Terminal B arrivals and departures halls will open in 2020, while Delta's new arrivals and departures halls in Terminal C will open in 2021. LaGuardia's new Central Hall will connect both terminals, creating a fully unified airport worthy of New York.	The \$2.7 billion investment to build a new Terminal One represents the largest design-build project in the history of the Port Authority in New Jersey. Terminal One, which is replacing the outmoded Terminal A that first opened 46 years ago, will feature cutting-edge digital technology, superior dining and retail options in approximately one million square feet of space able to accommodate 13.6 million passengers on three levels. The new terminal will have 33 common-use gates to handle larger aircraft and modernized check-in, security and baggage claim areas.	In October 2018, New York Governor Andrew M. Cuomo announced a \$13 billion investment – \$12 billion from private funding – to transform JFK into a world-class 21st-century airport. Two new major international terminals will add 4 million square feet to the airport's north and south sides, increasing the airport's capacity by at least 15 million passengers annually and transforming traveler experience from curb to gate. The historic investment advances the Governor's JFK Vision Plan, first unveiled in 2017 for a unified, modern airport with world-class passenger amenities, expanded taxway and gate capacity, state-of-the-art security, streamlined roadway access and centralized ground transportation options. The first new gates will open in 2023 with project completion in 2025.

GET TO KNOW THE TEUPEN TL 156AX "BIG RED"

The TEUPEN TL 156AX is custom designed to suit the needs of the World Trade Center Oculus. Comprehensive safety control systems, onboard diagnostics and our trained personnel ensure safe operation of the crane. Light enough to traverse the Lasa white marble floor, yet tall enough to reach the skylight 160 feet above. "Big Red" is deployed for maintenance and inspections of the Oculus.
